<INTERESTS />

<ABOUT ME />

I'm Daniele, a seasoned **Software Engineer** with over a decade of experience in the tech realm.

My career is fueled by my passion for writing **clean code** and mastering engineering management. Beyond just coding, I'm dedicated to **mentoring** on the art of creating elegant software.

My heart lies in backend development. I'm particularly skilled in **PHP** and yes, I like **Laravel**. **Typescript** also excites me in its entirety and in its flexibility between frontend and backend.

Currently, I'm immersed in a colossal **Domain-Driven Design** project leveraging **Symfony**, illustrating my commitment to both innovation and excellence in software development.

I'm an active member of **PUG Torino** and take every opportunity to share my knowledge as a **speaker**.
